Contents

1 Introduction
Course Goals 1-2
Course Road Map 1-3
Practice Environment 1-4
Additional Resources 1-5
Other Related Oracle University Courses 1-6

2 Introducing the Oracle Database
Course Road Map 2-2
Objectives 2-3
Agenda 2-4
Relational Databases 2-5
Relational Database Terminology 2-6
Relating Multiple Tables 2-8
Human Resources(HR)Schema 2-9
Agenda 2-10
Structured Query Language (SQL) 2-11
SQL Statements 2-12
Using SQL to Access the Database 2-13
Development Tools for Oracle Database 2-14
Quiz 2-15
Agenda 2-16
Oracle Instance and Database: Overview 2-17
Common Tasks of an Oracle Database Administrator 2-18
Tools for Administering an Oracle Database 2-19
Summary 2-21

3 Installing Oracle Database and Creating a Database
Course Road Map 3-2
Objectives 3-3
Agenda 3-4
Installation Workflow 3-5
Oracle Universal Installer 3-6
Installation Prerequisites 3-7
Setting Environment Variables 3-8

Agenda 3-9
Installation Steps 3-10
Specifying Installation Options 3-11
Selecting the Installation Option Type 3-12
Specifying the Database Edition 3-13
Choosing the Installation Location 3-14
Creating the Inventory Directory 3-15
Privileged Operating System Groups 3-16
Root Script Execution Configuration 3-17
Performing Prerequisite Checks 3-18
Reviewing the Installation Summary 3-19
Installing Product Software 3-20
Completing the Installation 3-21
Agenda 3-22
Database Configuration Assistant 3-23
Creating a Database 3-24
Managing Templates 3-25
Managing Oracle Multitenant 3-26
Completing the Installation 3-27
Quiz 3-28
Summary 3-29
Practice 3: Overview 3-30

4 Using Enterprise Manager Database Express and SQL-Based Management Tools

Course Road Map 4-2
Objectives 4-3
Agenda 4-4
Management Framework 4-5
Enterprise Manager: Overview 4-6
Configuring the HTTPS Port for EM Express 4-7
Accessing EM Express 4-9
Using the Database Home Page 4-10
Granting Access to EM Express 4-11
Quiz 4-12
Agenda 4-13
SQL*Plus 4-14
Using SQL*Plus to Access the Database 4-15
Oracle SQL Developer 4-16
Using SQL Developer to Access the Database 4-17
Oracle SQL Developer: Connections 4-19

Summary 4-20
Practice 4: Overview 4-21

5 Configuring the Oracle Network Environment
Course Road Map 5-2
Objectives 5-3
Agenda 5-4
Network Configuration: Overview 5-5
Oracle Net Listener: Configuration and Management 5-6
Tools for Configuring and Managing the Oracle Network 5-7
Agenda 5-8
Using the Listener Control Utility 5-9
Agenda 5-10
Connecting to an Oracle Database Instance 5-11
Name Resolution 5-12
Oracle Net: Naming Methods 5-13
Quiz 5-14
Summary 5-15
Practice 5: Overview 5-16

6 Managing the Database Instance
Course Road Map 6-2
Objectives 6-3
Agenda 6-4
Oracle Instance Management 6-5
Initialization Parameters 6-6
Oracle Processes 6-7
Oracle Memory Structures 6-9
Quiz 6-11
Agenda 6-12
Starting and Shutting Down an Instance 6-13
States of an Instance 6-14
Stopping and Starting an Instance by Using SQL*Plus 6-15
Stopping and Starting an Instance by Using SQL Developer 6-16
Stopping and Starting an Instance by Using Windows Services Program 6-17
Quiz 6-18
Agenda 6-19
Viewing Initialization Parameters 6-20
Modifying Initialization Parameters 6-21
Agenda 6-22
Managing Memory Components 6-23

Viewing Memory Settings 6-24
Summary 6-25
Practice 6 Overview: Managing an Instance 6-26

7 Managing the Database Storage Structures
Course Road Map 7-2
Objectives 7-3
Lesson Agenda 7-4
Oracle Database Structures 7-5
Exploring the Storage Structure of the Oracle Database 7-6
Control Files 7-7
Redo Log Files 7-8
Multiplexing the Redo Logs 7-9
Tablespaces and Data Files 7-10
Tablespaces in the Preconfigured Database 7-11
Enlarging the Database 7-12
Quiz 7-13
Lesson Agenda 7-14
Creating a New Tablespace 7-15
Modifying a Tablespace 7-17
Dropping a Tablespace 7-18
Lesson Agenda 7-19
Understanding Undo Data 7-20
Storing Undo Information 7-22
Comparing Undo Data and Redo Data 7-23
Using SQL Developer to View Undo Information 7-24
Managing Undo 7-25
Quiz 7-26
Summary 7-27
Practice 7: Overview 7-28

8 Administering Users and Security
Course Road Map 8-2
Objectives 8-3
Agenda 8-4
Overview of Users and Security 8-5
Oracle-Defined Users 8-6
Creating Users 8-7
Modifying Users 8-10
Dropping Users 8-11
Locking and Unlocking Accounts 8-12

Unlocking a User Account 8-13
Setting the Password Policy 8-14
Modifying the Default Password Policy 8-15
Administering Privileges and Roles 8-16
Agenda 8-17
Administrative Privileges 8-18
Granting Privileges 8-19
Agenda 8-20
Viewing Roles 8-21
Creating Roles 8-22
Modifying Roles 8-23
Quiz 8-24
Summary 8-25
Practice 8: Overview 8-26

9 Managing Schema Objects
Course Road Map 9-2
Objectives 9-3
Agenda 9-4
What Is a Schema? 9-5
Schemas 9-6
Accessing Database Objects 9-8
Specifying Data Types in Tables 9-9
Creating Tables 9-10
Modifying a Table 9-11
Understanding Data Integrity 9-12
Defining Constraints 9-14
Agenda 9-15
Viewing the Contents of a Table 9-16
Dropping a Table 9-17
Agenda 9-18
Managing Indexes 9-19
Viewing Indexes 9-20
Creating and Dropping Indexes 9-21
Dropping Indexes 9-22
Managing Views 9-23
Managing Program Code Stored in the Database 9-24
Managing Access to Schema Objects 9-25
Quiz 9-26
Summary 9-27
Practice 9: Overview 9-28

10 Performing Backup and Recovery
Course Road Map 10-2
Objectives 10-3
Agenda 10-4
Oracle Recovery Features 10-5
Backup File Types 10-7
Types of Backups 10-9
Media Recovery Options 10-11
Media Recovery Steps 10-12
Configuring the Database for Backup and Recovery 10-13
Agenda 10-14
Configuring the Fast Recovery Area 10-15
Credentials Required to Perform Backup and Recovery 10-16
Connecting to the Target Database Instance 10-17
Configuring Recovery Settings 10-18
Configuring Backup Settings: Disk Settings 10-20
Configuring Backup Settings: Policy Settings 10-21
Agenda 10-22
Whole Database Backups 10-23
Backing Up the Database 10-24
Suggested Backup Strategy 10-25
Managing Your Backups 10-27
Performing Backup Maintenance Tasks 10-28
Quiz 10-30
Agenda 10-31
Performing Oracle Advised Recovery 10-32
Using the Data Recovery Advisor 10-33
Agenda 10-34
Flashback Table 10-35
Enabling Row Movement on a Table 10-36
Performing Flashback Table: Steps 10-37
Performing Flashback Table 10-38
Recovering Tables by Using Flashback Drop 10-39
Performing Flashback Drop 10-40
Quiz 10-41
Summary 10-42
Practice 10: Overview 10-43

11 Monitoring the Database and Using Advisors
Course Road Map 11-2
Objectives 11-3

Agenda 11-4
Proactive Database Monitoring 11-5
Monitoring the General Database State and Workload 11-6
Monitoring Performance 11-7
Diagnosing Performance Problems 11-8
Types of ADDM Findings 11-9
Viewing a Summary of ADDM Performance Findings 11-10
Responding to Findings 11-11
Quiz 11-12
Agenda 11-13
Using Advisors 11-14
Performance Advisors 11-15
Using the SQL Tuning Advisor 11-16
Automatic SQL Tuning Advisor 11-17
Summary 11-18
Practice 11: Overview 11-19

12 Managing the Software
Course Road Map 12-2
Objectives 12-3
Agenda 12-4
Understanding Software Management and Patch Releases 12-5
Quiz 12-6
Agenda 12-7
Using the Database Upgrade Assistant to Upgrade the Database 12-8
Removing Oracle Database Software 12-10
Quiz 12-11
Summary 12-12

13 Oracle Database Cloud Service: Overview
Objectives 13-2
Database as a Service Architecture 13-3
Database as a Service: Features and Tooling 13-4
Software Editions: Included Database Options and Management Packs 13-5
Accessing the Oracle Database Cloud Service Console 13-6
Automated Database Provisioning 13-7
Accessing Tools from the Service Console 13-8
Managing the Compute Node Associated with a Database Deployment 13-9
Managing Network Access to Database as a Service 13-10
Enabling Access to a Compute Node Port 13-11
Scaling a Database Deployment 13-12

Patching Database as a Service 13-13
Using the Oracle Database Cloud Service Console to Manage Patches 13-14
Summary 13-15
